LIFE & EXPERIENCE

Military Service

Served at the Givati brigade
as a fighter.

About myself

📅 1999 - Ongoing

Highly motivated, self and quick learner.

I learned the basics of programming from the Technion's math and programming courses.

Beyond the freelance jobs I look into web courses in udemy and tutorials in the field of android development and machine learning.

Python Developer (freelance)

Program 4 U

2019 - Ongoing

Developer of desktop and mobile applications for various tasks (Working with images, files, etc), with a user-friendly interface.

Skills

- Desktop Apps
- Flutter Apps
- Algorithm Design & Analysis
- Data Structures
- User Interface
- Django
- Git
- Python web automation using selenium
- Web Scraping using BeautifulSoup
- Game Developer

Projects

Feel free to visit my github page to see some projects

- My brother and I developed an auto-scrolling game using computer vision and Deep Learning.
The game let the player control the height of the character with his body through the webcam.
- I have developed an application that allows construction companies to manage projects efficiently using flutter.
- Developed a 2D fighting game using pygame.
- InstaBot - I developed a bot that automates operations on Instagram.
- Developed a blog website using django.
- I wrote scripts for various tasks.

PROGRAMMING

Python

C / C++

Dart

Javascript

Java

HTML & CSS

STRENGTHS

Reliable and Consistent

Self-Learner

Researching the project I want to build.
Learns from the Internet the optimal way to realize it

Hard-working

complete projects before time, does more than required

Problem solving

Analyze problems to find causes, find possible solutions
